The Historical Context of Australian Currency

Pre-Decimal Currency System in Australia

Before decimal currency was adopted, Australia used the British monetary system, which was based on pounds (£), shillings (s), and pence (d). This system had been inherited from Britain and was widely used across the British Empire, including Australia, since the early colonial period. - Structure of the pre-decimal system: - 1 pound = 20 shillings - 1 shilling = 12 pence - Therefore, 1 pound = 240 pence This complex system made calculations and transactions

increasingly cumbersome, especially as the economy grew and commerce expanded.

Challenges of the Old System

As Australia's economy developed through the early 20th century, several issues with the old system became apparent: - Complex calculations: The non-decimal nature made mental math and accounting more complex. - Limited technological support: Cash registers, vending machines, and other machinery had difficulty adapting to the intricate subdivisions. - International trade complications: The British system was increasingly incompatible with the decimalized currencies of other countries, hindering trade. These factors created a compelling case for currency reform, leading to the eventual move towards decimalization.

The Drive Towards Decimalization

Global Trends and Influences

The mid-20th century saw many countries adopting decimal currencies to facilitate international trade and economic integration. The Date and Implementation

After extensive preparations, the switch was scheduled for 14 February 1966. This date was chosen to minimize disruption and allow sufficient time for public adaptation. - Dual currency period: For a short transition period, both old and new currencies circulated simultaneously. - Conversion rate: 1 pound (£) was equated to 10 new dollars, marking the start of the decimal system. - Introduction

of the Australian dollar (AUD): The new currency was named the "Australian dollar," symbolized as "\$" and abbreviated as "A\$."

Details of the Changeover

- Coins introduced: Decimal coins included 1, 2, 5, 10, 20, and 50 cents. - Banknotes: Denominations ranged from \$1 to \$10, with designs reflecting Australian flora, fauna, and heritage. - Transition process: Old pounds, shillings, and pence coins and notes remained in circulation for a limited period before being withdrawn.
